Mecha Swing Nozzle

An innovative compressed air tool which uses a high-speed oscillating nozzle with a wide arc that helps in dispersing liquid to a wider area.

Nozzle Unit

with Gun

Air Shock Gun

This specialized tool generates a powerful wave of compressed air that is effective for dust removal, draining and drying.

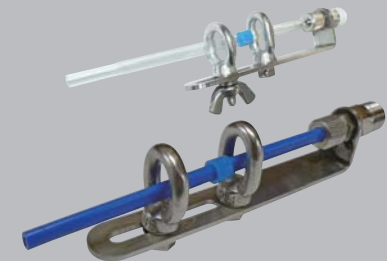

with Gun

Nozzle Unit

Air Shock Gun Unit

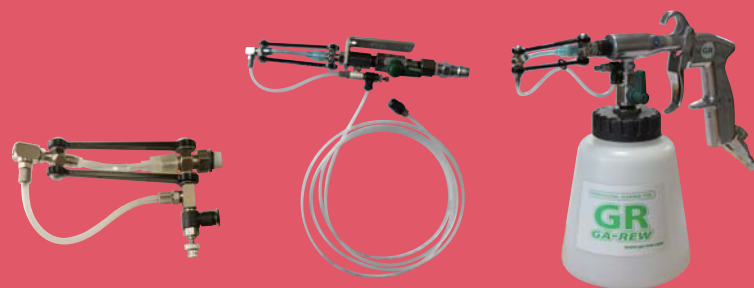

This unit is designed to be installed on production lines for dust removal, draining and drying. The swing width can also be varied to specifically suit the application.

Nozzle Unit

Mecha Swing Mist

The oscillating nozzle helps disperse a large amount of fine mist to a wider area compared to conventional mist nozzles.

Nozzle Unit

Suction Type

with Bottle

Adjustable Shock Gun (Swing/Rotating type)

The adjustable nozzle can vary the width and rotating diameter of the nozzle to better suite the application. The Adjustable Shock Gun with its rotating jet of air is able to reach in-between grooves and gaps for a more effective clean.

Nozzle Unit

Precision Cleaning Brush Gun (Straight hair type/Wavy hair type)

By utilizing the synergistic effect of compressed air and the vibrating brush, the Precision Cleaning Brush Gun can effectively remove dust from small and hard-to-reach places. The compressed air agitates the dust particles while the brush absorbs them. It is recommended to moisten the brush with water to effectively remove stains on carpets or remove dust from electrically charged surfaces.

with Gun

Nozzle Unit

Air Blaster

The more powerful version of the Air Shock Gun, this tool is best suited for fine metal burr/shaving removal. It is also effective in removing dust and chips from the work area without causing any damage to the work.

with Gun

Nozzle Unit

General Cleaning Brush Gun

An affordably priced model within our Brush Gun series, this tool is suitable for cleaning fabrics and Air Conditioning vents. The reduced bristle density along with the vibration of the brush increases the cleaning effectiveness.

with Gun

Nozzle Unit

Air Blaster Mini

A more compact version of the Air Blaster, this tool is suitable in removing fine metal burrs/shavings, dust and chips. It is also an effective garlic peeler.

with Gun

Nozzle Unit

Vortexer

A high-performance spray gun with a two-stage trigger which can switch “air only” and “air with mist” easily. You can spray fine particles of various agents such as photocatalysts, deodorants, anti-mold agents, and disinfectants.

Normal Type

Adjustable Type

Deburring Brush Gun

It can remove fine burrs with a shock wave of injected air and vibration of the abrasive brush. The best suited for quickly and efficiently fine burrs removal of metals and plastics.

with Gun

Nozzle Unit

Sonic Cleaner

This versatile equipment is ideal for cleaning nursing care products. It can clean a wheelchair in a few minutes with a small amount of household laundry detergents. Washing with detergents, rinsing, draining, drying, and applying antibacterial deodorant agents can be simply and easily performed!

Static Electricity Removal Brush Gun

The material of the brush has anti-static properties, so it is suitable for dust removal and cleaning during cutting process of plastics, or cleaning of cutting section after press working. Also ideal for use in flammable places.

Nozzle Unit

PRO-LINE Blaster

The best compact tools to be installed on production lines. Rotate at high speed even at low pressure. Using them can improve your work efficiency, help reduce operating costs, and save energy!

Tornado Vacuum Cleaner

An effective way to clean vehicle seats, carpets, and mats from fine dust, pet hair, mites and pollen. The Tornado Cleaner uses a jet of air to agitate debris stuck in the fabric, which is then sucked into the vacuum cleaner.

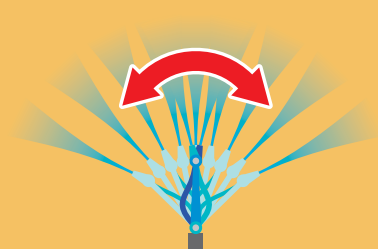

*These models are used in combination with vacuum cleaners.

Low - High Pressure Water Swing Nozzles

The swing nozzles are specialized for use with water/coolant liquid. The wider arc of the oscillating nozzle can spray water/coolant over a wide range while maintaining water/coolant pressure. The wider range and constant pressure ensure a more effective cleaning.

Note: These are custom-made tools.

They can spray a wider range

Tornado Mist Cleaner Series

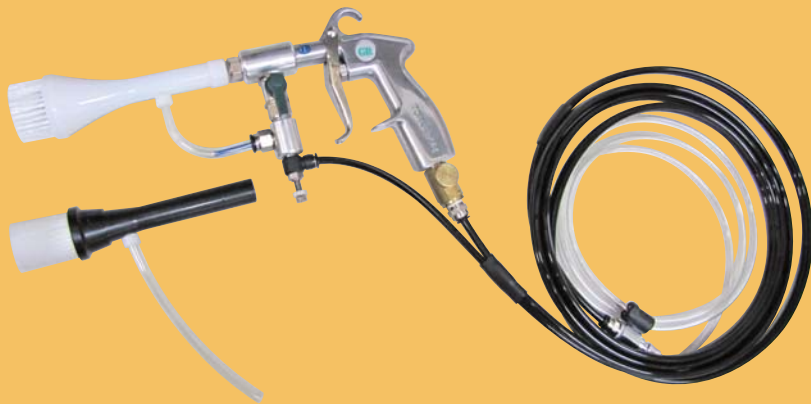

An updated version of the Tornado Cleaner with an added mister function. Stubborn stains such as coffee, blood, or pet waste can be efficiently removed from carpets and mats with a small amount of water or cleaning solution used in the process.

*These models are used in combination with wet and dry vacuum cleaners.

Brushing Cleaner

This multi-purpose 5-in-1 cleaner can be used for dry/semi-dry/wet cleaning, draining, and drying. The vibration of the brush and the jet of air effectively removes stubborn oil, water and yellow stains within a short period of time.

Air Mousse Gun

It turns detergent/cleaning solution into thick, fluffy, long-lasting foam. Unlike traditional foam guns which uses water to create the foam, the Air Mousse Gun uses only air which makes the foam less heavy therefore helps the foam cling onto vertical surfaces and prevents it from dripping down. As a benefit a small quantity of detergent/cleaning solution diluted with water is required which reduces running costs.
